CONTENTS

Vol. 4, No. 1 **March 1975**

A Decision Theory Method for the Analysis of Texture 1
Bruce H. McCormick and Sadali N. Jayaramamurthy

On-Line Student Debate: An Experiment in Communication Using Computer Networks 39
Siegfried Treu

A Note on Lindenmayer Systems, Szilard Languages, Spectra, and Equivalence 53
Derick Wood

Fuzzy-State Automata: Their Stability and Fault Tolerance 63
M. Dal Cin

Modification Tolerance of Fuzzy-State Automata 81
M. Dal Cin

Left-Noncounting Languages 95
H. J. Shyr and G. Thierrin

Announcement 103

Vol. 4, No. 2 **June 1975**

Recursive Data Structures 105
C. A. R. Hoare

A Pragmatic Proposal for the Improvement of Program Modularity and Reliability 133
Michael J. Spier

Process Synchronization in High-Level Languages 151
Santosh K. Shrivastava

On Data Retrieval from Unambiguous Bit Matrices 171
Y. R. Wang

On Storing Arbitrarily Many Extendible Arrays of Arbitrary Dimensions 189
Arnold L. Rosenberg

Vol. 4, No. 3 **September 1975**

File Evaluation in Auxiliary Storage 197
Lawrence L. Rose and Malcolm H. Gotterer

Sequential Classification of Strings Generated by SCFG's 205
E. Persoon and K. S. Fu

Subword Complexities of Various Classes of Deterministic Developmental Languages with Interactions 219
A. Ehrenfeucht, K. P. Lee, and G. Rozenberg

Some Structural Complexities of Time-Varying Sequential Machines 237
Kai Hwang

Parameter Optimization of Stochastic Automata Operating in Random Environments 247
Hsi-Han Yeh

Relevance of Computer Science to Linguistics and Vice Versa 265
J. A. Moyne

Vol. 4, No. 4 **December 1975**

Near-Optimal Heuristics for an Assignment Problem in Mass Storage 281
P. C. Yue and C. K. Wong

The Analysis of an Adaptive Workload Balancing Strategy in Computing System Resources Management 295
Hisao Kameda

Storage Cost Considerations in Secondary Index Selection 307
P. C. Yue and C. K. Wong

A Heuristic-Adaptive Procedure for Segmentation of Time Patterns 329
Beng-Tung Ang

A Self-Organizing Model of the British Economy for Control with Optimal Prediction Using the Balance-of-Variables Criterion 349
P. C. Parks, A. G. Ivakhnenko, L. M. Boichuk, and B. K. Svetalsky
